Warehouse Automation

In current age of industrialization, manufacturing activities are continuously expanding, thanks to the ever-growing demand for products. In this scenario, warehousing has gained tremendous importance in the supply chain. The warehouse is a crucial link between a manufacturing facility and its suppliers, as it governs the flow of materials and ultimately affects productivity.

Vertical Marketing System and Oracle CRM

A vertical marketing system is one in which the main members of a distribution channel—producer, wholesaler, and retailer—work together as a unified group in order to meet consumer needs. In conventional marketing systems, producers, wholesalers, and retailers are separate businesses that are all trying to maximize their profits.
