

iWareLogic

Oracle Application Express combines the qualities of a personal database, productivity, ease of use, and flexibility with the qualities of an enterprise database, security, integrity, scalability, availability and built for the web.

ACE Apex Development for one of the IT companies in NetherLands

The client has more than a decade of experience in IT, well known for their no-nonsense solutions.

Pragmatic and without fuss - always Value for Money!

iWareLogic played a vital role in building a consultancy application in an iterative fashion with minimal specs and maximal interaction with developers.

ACE Apex Development for one of the IT companies in the Netherlands

The client has more than a decade of experience in IT, well known for their no-nonsense solutions. Pragmatic and without fuss - always Value for Money!

Demand Drivers

- Intends to capture in a simple, web-based application running on a reliable / scalable RDBMS.
- Should be able to handle role based authorizations.
- Application should allow sales people to capture acquisition activities and to manage contracts (time-material and fixed price).
- Application should be capable to capture some customer, HR and finance related information.
- The application should be able to interact with third party APIs like Google Maps.
- The application should be multi lingual.

Pain Points / Challenges

- Implementation of time-tracking module that does not reflect flat database structure in the GUI.
- Implementation of Google Maps – get directions with the help of APEX plug-in.
- Upload and download of files / documents to the application.
- Restructuring the GUI and implementation of dynamic functionalities using AJAX.

Approach / Solution

- Oracle Application Express (Oracle APEX) is a rapid web application development tool for the Oracle database.
- Using only a web browser and limited programming experience, you can develop and deploy professional applications.
- Choose the Oracle-based architecture for its flexible, modular design.

Results

- Developed a complete consultancy application in an iterative fashion with minimal specifications and maximal interaction with the client.
- On time delivery of the application with 100% positive feedback.

What the Client had to say?

“During our search for a partner in off-shore APEX development we accidentally stumbled upon iWare Logic Technologies Pvt. Ltd. And how fortunate it was!

Our idea was to build a consultancy application in an iterative fashion with minimal specs and maximal interaction with developers.

For this approach to succeed you need smart people who can think a few steps ahead, come up with ideas and alternatives and are able to communicate in a clear and concise manner. The people of iWareLogic have shown that they can fully cope with this concept. The results were beyond expectation!

Looking forward to our next project!”

- Leading IT Services Company in the Netherlands.
