

iWareLogic

Oracle Warehouse Builder (OWB) is a business intelligence tool that provides an integrated solution for designing and deploying enterprise data warehouses, data marts, and business intelligence applications. It solves the complex problem of data integration between dispersed data sources and targets. In addition, Warehouse Builder provides all the necessary functionality to maintain the life cycle of the system you develop.

CBID Upgradation using OWB for leading IT products and services company in Sweden

iWareLogic played a vital role in saving client's huge time and were able to successfully upgrade 500+ mappings to OWB 11g.

CBID Up gradation using OWB for leading IT products and services company in Sweden

The client is a leading IT products & services company with offices in Australia Europe. Backed by decades of demonstrated industry experience, our exceptional people offer unparalleled capabilities across the entire software development lifecycle.

Demand Drivers

- Wanted to upgrade the mappings from OWB 10g to OWB 11g.
- This assignment contains total 6 modules those need to be migrated using OMB Plus scripts.
- Have to validate, deploy every object using scripts only at runtime.

Pain Points / Challenges

- Identify and build the generic script for the all the objects in OWB and database and perform every step through generic OMB Plus scripts.

Approach / Solution

- Used Oracle Warehouse Builder scripting to design the generic code to import the mdl, create the locations and validate and deploy the same.
- Maintained the configuration details of OWB 10g mappings with OWB 11g by comparing the configurations.
- Build the batch file which calls the Application scripts that includes all TCL and SQL.
- Generated the scripts to remove or drop the unnecessary objects.

Results

- Due to generic scripts, huge time was saved.
- Successfully Upgraded 500+ mappings to OWB 11g.

What the Client had to say?

“It was an immense pleasure working with iWareLogic, they’ve a highly talented team which identified and built the generic script for the all the objects in OWB & database and they performed every step through generic OMB Plus scripts. As a result our huge time was saved and we were able to successfully upgrade 500+ mappings to OWB 11g”

- Leading IT products and services company in Sweden
