Oracle's BI platform is an enterprise-class platform for all modes of reporting and information delivery including enterprise reporting, dashboards, ad hoc analysis, OLAP, and predictive analytics. Oracle BI platform can push information to users through notifications or embed it within business process workflows. Oracle Business Intelligence simplifies systems deployment and management through integrated systems management capabilities.

MIA OBIEE Metadata and Reports Designing for one of the Insurance Companies in Ireland

In Europe, the client is a Lifestyle Protection and Mortgage Insurance business. The power of their promises help people secure their finances and look after their families and futures. Because their promises protect the precious moments that matter in people's lives.

iWareLogic was able to offer the client a "Turn Key" solution on a low monthly price per image basis.

MIA OBIEE Metadata and Reports Designing for one of the Insurance Companies in Ireland

In Europe, the client is a Lifestyle Protection and Mortgage Insurance business. The power of their promises help people secure their finances and look after their families and futures. Because their promises protect the precious moments that matter in people's lives.

Demand Drivers

- Tool capabilities to provide a pure web based environment.
- Need analytical reports to get the input values to update the database.
- Need navigation paths from the measures to different reports.
- Tool should manually override the summary and detailed values in the reports.
- Reports to be displayed in Month Matrix format.
- Display the dense data with zero values onto the report.

Pain Points / Challenges

- Getting the BI reports displayed in the same format as already available in their existing tool.
- Aligning the client priorities with business demands.
- Projecting capacity utilization and achieving scalability.
- Managing the delays in the project schedule.

Approach / Solution

- OBIEE is a comprehensive suite delivering the full range of BI capabilities including interactive dashboards, full ad hoc intelligence, alerts and more.
- Integrated OBI with Oracle Apex for getting the input values.
- Pure web based solution that supports GOURL kind of features.
- Based on RDBMS and data warehousing concepts, implemented complex formulas, aliases etc.
- Configured the tool with drilling down features on combined reports.

Results

- Client had a positive experience of working with iWareLogic on the BI project.
- The team at iWareLogic exceeded the client expectations in terms of the quality of products and services provided.
- A complete BI implementation has been provided that was integrated with APEX technology.

What the Client had to say?

“iWareLogics’ fully customizable end to end solution provides not only the standard data extraction and approval workflow, but incorporates our custom online forms, business rules, and data feed as well. No other solution we reviewed was able to offer this in a “Turn Key” low monthly price per image basis.”

– Leading Insurance Company in Ireland.
